GOLDEN FORESTS

Premium Agroforestry Investment Platform and Plantation Management

Business Presentation

February 2026

Introduction and Vision

Golden Forests: Premium agroforestry investment platform

Vision: Lead sustainable agroforestry in Asia using AI, science, and elite genetics

Mission: Deliver outstanding long-term returns with measurable environmental and social impact

Company Overview

Multi-jurisdictional structure: Abu Dhabi (holding), Dubai (sales/marketing), Philippines (operations)

Focus: High-value agarwood (Aquilaria crassna) and Carabao Mango; dual crop strategy to diversify revenue and stabilize cash flow

Scalable, replicable business model for geographic and crop expansion

Strategic Location: The Philippines

- Favourable climate, skilled labour, and government incentives
- Zambales: optimal for both agarwood and mango cultivation
- Strong export infrastructure and access to key markets
- Easy access for client plantation visits and designed to promote ecotourism

Agarwood Marketing Opportunity

Global market: USD 41B (2024), projected USD 85B by 2034

Premium pricing: up to USD 2000-5000 for high grade oud wood chips

Demand: Middle East, East Asia, Europe, US

Supply-constrained, CITES-regulated; plantation-grown agarwood preferred

Mango Market Opportunity

Global market: USD 55.2B (2025), projected USD 68.3B by 2030

Carabao Mango: internationally recognized for sweetness and export value

Philippine exports: USD 1.6B annually, premium pricing in Japan, Korea, US, Middle East

Products and Services

Professionally managed plantations: agarwood (10-year cycle), mango (25-year cycle)

Direct tree ownership: for clients, with GPS verification and annual audited reports

1:1 reforestation: one native tree planted for every commercial tree sold

Business model

Upfront tree sales fund operations and expansion

Recurring commission revenue: 10% on agarwood, 20% on mango sales

Self-funding growth, aligned incentives, and high-margin recurring revenue

Financial Highlights

15-year projection:
USD 1.3B gross sales,
USD 574.9M net sales

Cumulative net income:
USD 321.8M;
net margin: 30.5%

Strong liquidity:
USD 155.5M cash by year 15;
no long-term debt

Client Investment Returns

Agarwood: ~18% annualized return over 10 years

Mango: ~12% annualized (years 1–15), >20% (years 16–25)

Returns based on conservative yield and price assumptions

Pricing and Investment Returns

Agarwood: USD 292.50 per tree (introductory), volume discounts available

Mango: USD 592.50 per tree (introductory), volume discounts available

Annual price escalation: 1.5% (agarwood), 3% (mango)

Technology and Innovation

AI-enabled plantation management: soil, climate, pest, and yield monitoring

Drones for crop health, precision input application, and yield estimation

Proprietary inoculation for agarwood; elite mango hybrid development

Sustainability & Impact

1:1 reforestation for every tree sold

Community employment, skills development, and local economic impact

Pursuing FSC (agarwood) and PEFC (mango) certifications

Risk Mitigation

20% surplus planting buffer for mortality protection

20% fruiting buffer for the yield of mango fruits

Comprehensive insurance and risk management protocols

Regulatory compliance: CITES, FSC, PEFC, and local permits

Growth Strategy

Geographic expansion: model replicable across Southeast and South Asia

Crop diversification: durian cultivation launching 2027

Value-added processing and digital marketplace development

Management & Partnerships

80+ years combined plantation management experience

Scientific partnerships: PRMSU, VSU, UPLB, DENR, DOST

Board and advisory panel with deep sector expertise

(**see Appendix C** : Executive Manegement and Directors)

Investment Terms

Senior secured loan:
$350,000, 8% p.a., 12 months

Collateral Assets Vested:
600 agarwood,
300 mango trees

Collateral Security:
- 10% equity in escrow
- 100% tree replacement guarantee
- annual audited reporting

Key Takeaways

High-growth, supply-constrained markets with premium pricing

Proven, scalable, and capital-efficient business model

Strong financials, robust risk management, and sustainability focus

Attractive client and investor returns
